

Mr. Milliron ◆

Attached is the report without most of the appendices. I◆ will have those scanned separately and emailed later today. This file should be well below any email size thresholds.

Please let me know if you have any questions or would like to review options. USDA did a preliminary underwriting of this project and was ready to commit at least \$2.5M in grant funds. Both the PER and Environmental Report have been approved by USDA◆ but that is where the process stopped.

Regards,
Chris
